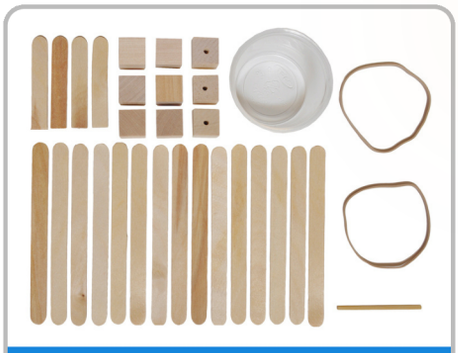
CLASS 1 CATAPULT



Materials

1

1. Build the base. Use half craft stick pieces along the width

2

2. Create triangular supports with cubes with holes at the top

3

3. The catapult arm is 2 sticks long. A cube with hole is glued closer to one end

4

4. Put a small piece of dowel through the cube in the arm

5

5. Carefully spread the supports apart and fit the ends of the dowel into the cubes with holes

6

6. Glue and tape a cup onto the long end of the arm. Glue a craft stick onto the other end

7

7. To fire: load a projectile, then firmly and quickly press on the catapult arm
